VWWA Objectives

The Virginia Water Well Association was established in June, 1949. The purposes, as set forth in the Association's original Constitution, are as relevant today as they were in 1949:

To assist, promote, encourage, and support the interests and welfare of the ground water industries in all phases generally, and in particular within the Commonwealth of Virginia;

To foster, aid and promote scientific education, standards, research, and techniques in order to improve methods of well construction and development, and to advance the science of groundwater hydrology;

To promote harmony and cooperation between well contractors, water treatment installers, onsite waste water systems installers and geothermal installers as well as governmental and scientific agencies relevant to the proper development and protection of groundwater supplies;

To encourage cooperation of all interested groups relative to the improvement of drilling, pumping equipment, water treatment, waste water and geothermal technologies;

To encourage, serve assist and promote close cooperation with the National Ground Water Association, Inc.;

To collect, analyze and disseminate to the public facts about the role of the water well industry and the onsite water industries in general in the economy of the Commonwealth of Virginia and of the nation; and,

To advance generally the mutual interests of all those engaged in the onsite groundwater industries, in their own and in the public interest.
